

Project Manager (PM)

Essential

- Jira
- Confluence
- Microsoft Teams
- Outlook

Recommended

- ClickUp / Microsoft Project (quản lý roadmap nếu dùng)
- Google Sheets / Excel (theo dõi ngân sách, trackers)
- Power BI / Dashboard (tổng hợp KPI)

Optional

- Zendesk (nắm tổng quan support SLA)
- LaunchDarkly (nắm khái niệm feature flag khi quản lý release)
- Sentry / Grafana (hiểu báo cáo incidents cơ bản)

Business Analyst (BA)

Essential

- Confluence
- Jira
- Figma (xem mockups / tạo prototype cơ bản)
- Draw.io (flowcharts, diagrams)
- Microsoft Teams
- Outlook

Recommended

- Miro (workshop, user journey)
- Postman (hiểu API basics để viết spec)
- Hotjar / Google Analytics (hiểu user behaviour cơ bản)

Optional

- TestRail (cộng tác với QA writing test cases)
- Zendesk (hiểu ticket patterns và feedback)

Tech Lead / Solution Architect

Essential

- GitLab (repo & code management)
- GitLab CI / GitHub Actions (CI/CD concepts)
- Docker
- CloudFormation (IaC)
- Confluence
- Jira
- Microsoft Teams

Recommended

- Prometheus / Grafana (monitoring)
- ELK stack (logging)
- Sentry (error tracking)
- PostgreSQL / Redis / Elasticsearch (system-level understanding)
- Helm / kubectl / Kubernetes (orchestration concept)

Optional

- LaunchDarkly / Unleash (feature flags)
- Trivy / Snyk / OWASP ZAP (security scanning basics)

Backend Developer

Essential

- GitLab
- GitLab CI (pipeline usage) hoặc GitHub Actions (tuỳ organisation)
- Docker

- Node.js (Express / NestJS) hoặc Java Spring Boot (tuỳ stack)
- PostgreSQL
- Redis (caching basics)
- Postman (API testing)
- Jira
- Confluence
- Microsoft Teams

Recommended

- ELK / Sentry (logs & error triage)
- Prometheus / Grafana (basic metrics)
- Elasticsearch (nếu search được dùng)
- Vault / AWS Secrets Manager (secrets handling)
- CloudFormation (hiểu deploy infra)
- k6 / JMeter (performance testing basics)

Optional

- LaunchDarkly / Unleash (feature flags)
- Trivy / Snyk / OWASP ZAP (scan dependencies / security awareness)

Frontend Developer (Web)

Essential

- GitLab
- GitLab CI / GitHub Actions
- Docker (dev containers / build images)
- React.js / Next.js / TypeScript
- Figma (design handoff)
- Storybook (component-driven dev, nếu dùng)
- Cypress (web E2E basics)

- Jira
- Confluence
- Microsoft Teams

Recommended

- Sentry (frontend error tracking)
- Hotjar / Google Analytics (UX analytics)
- Lighthouse / performance tools
- LaunchDarkly / Unleash (feature flags)
- Postman (for API mocking/testing)

Optional

- ELK stack (if frontend logs aggregated)
- k6 (frontend-related load tests)

Mobile Developer

Essential

- GitLab
- GitLab CI / GitHub Actions (mobile pipeline)
- React Native (TypeScript) or native knowledge
- Docker (build environments where relevant)
- TestFlight / Google Play Console (internal testing & release)
- Jira
- Confluence
- Microsoft Teams

Recommended

- Fastlane (automation for builds/releases)
- Appium / Detox (mobile automation)
- Firebase Cloud Messaging / OneSignal (push integration)

- Sentry (crash reporting)
- Vault / Secrets Manager (secure keys)

Optional

- LaunchDarkly / Unleash (mobile feature flags)
- k6 / JMeter (backend load effects on mobile)

Tester / Quality Assurance (QA)

Essential

- Jira
- TestRail (test case management) or Jira Test Cases plugin
- Cypress (web E2E)
- Appium (mobile automation)
- Postman (API testing)
- Confluence (test plans, reports)
- Microsoft Teams

Recommended

- GitLab CI / GitHub Actions (CI integration to run automated suites)
- ELK / Sentry (triage logs & errors)
- k6 / JMeter (performance testing)
- OWASP ZAP (basic security scanning)
- Chrome DevTools / browserstack (cross-browser/device testing)

Optional

- Trivy / Snyk (dependency scanning awareness)
- Hotjar (UX-related test insights)

DevOps / Release Engineer

Essential

- GitLab + GitLab CI (or GitHub Actions)

- Docker
- Kubernetes (orchestration) + Helm / kubectl
- CloudFormation (IaC)
- AWS S3 (assets, artifacts)
- Vault / AWS Secrets Manager
- Prometheus / Grafana
- ELK stack (logging)
- Microsoft Teams / Jira / Confluence

Recommended

- Terraform (if dùng song song với CFN)
- Sentry / Datadog (APM)
- Trivy / Clair / Snyk (container scanning)
- LaunchDarkly / Unleash (release control)
- Fastlane (mobile release automation)
- PagerDuty / Opsgenie (oncall integration)

Optional

- GitLab Runner management, autoscaling on K8s specifics
- Advanced networking (VPC, Ingress controllers, service mesh basics)

UI / UX Designer

Essential

- Figma
- Confluence (design specs)
- Microsoft Teams
- Jira (link designs to stories)

Recommended

- InVision / Marvel (prototyping if team uses)

- Hotjar / Google Analytics (usability data)
- Zeplin / Figma inspect / Storybook (handoff)
- Miro (workshops)

Optional

- Draw.io (flow diagrams)
- Basic understanding of GitLab / Confluence workflows

Support / Customer Success

Essential

- Zendesk (ticketing)
- Confluence (knowledge base / KB)
- Microsoft Teams
- Outlook

Recommended

- Jira (escalate bugs / link tickets)
- Intercom (live chat, nếu dùng)
- Google Sheets / CRM tools (tracking trends & SLA)
- Sentry (to look up crash IDs)
- Hotjar (to investigate user sessions if available)

Optional

- LaunchDarkly (know feature flags to toggle features during incidents)
- Postman (basic API checks)
